

# Domestic Land Transport

Domestic land transport plays a critical role in the Mahyu system, offering routes with return options for the efficient distribution of raw materials and finished goods to both business and consumer users.

Integrated with our flexible mobile application, all users can enjoy convenience, with shippers able to monitor shipments from origin to destination, and transporters tracking their vehicles and drivers in real time.

The screenshot displays the Mahyu web dashboard for PT. Combi Logistics. The interface includes a top navigation bar with the Mahyu logo, a hamburger menu, and user information (PT. Combi Logistics, Online). A left sidebar contains a navigation menu with options like Home, Company Management, and Schedule Shipment. The main content area shows a 'Home Dashboard' with a 'Shipment Destination' map of Asia and a green sidebar with statistics: 5 SHIPMENTS, 100% DOMESTIC, and 0% INTERNATIONAL.

RESPOND

Dear Transporter,

Before accepting this shipment, please communicate directly with Shipper who has selected you as Transporter (or transporter at destination in International transaction).

Click **DISCUSS** , to chat with Shipper of any questions.

Mahyu will email Work Order notification to you with detail shipment information (For International shipment to include HS code) when shipment is accepted by you.

Thank you.

Submit

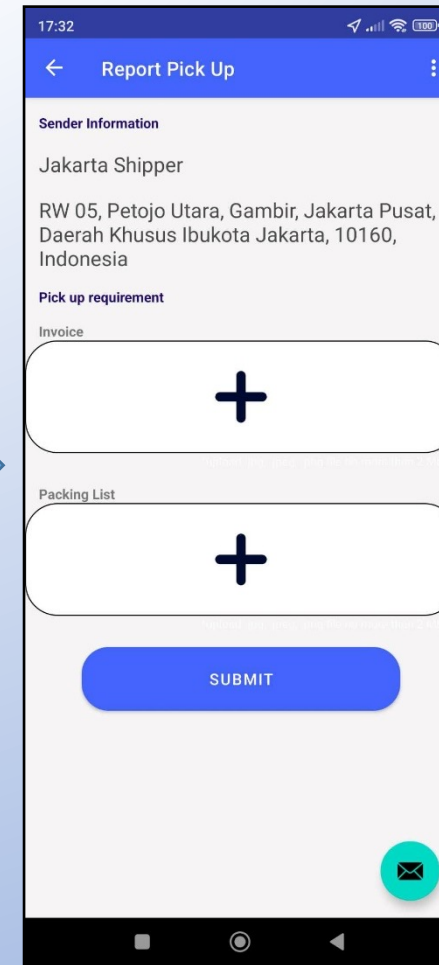

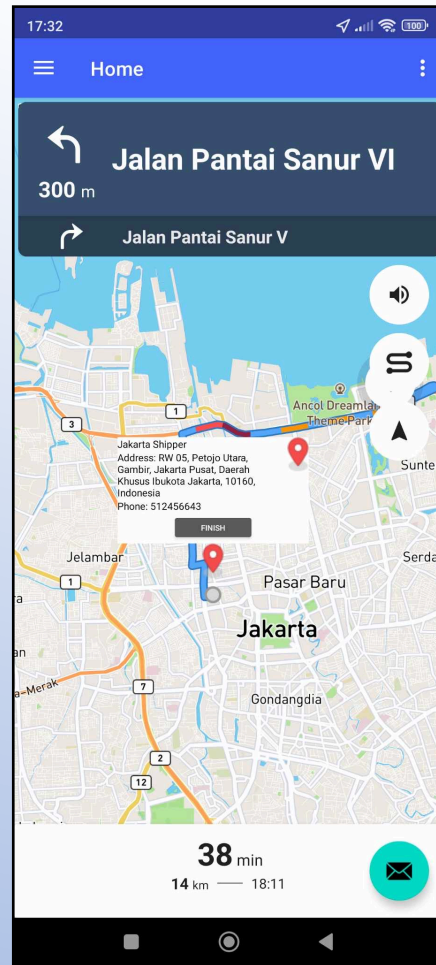

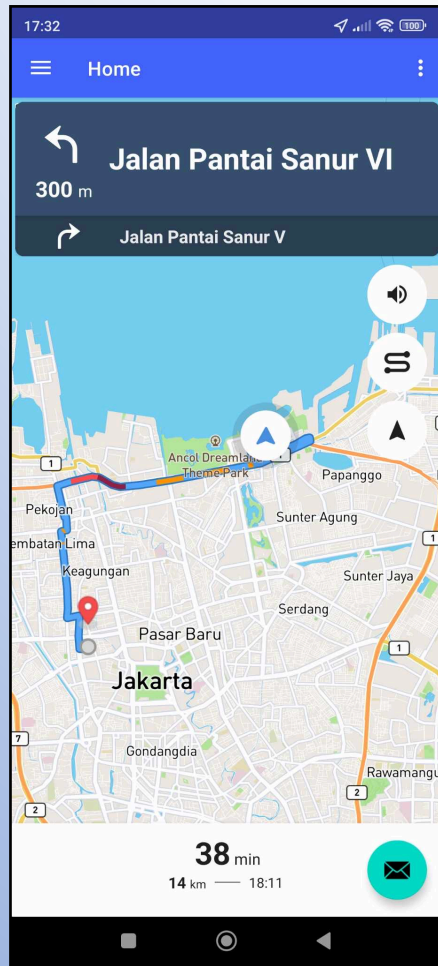

Upon receiving the order information, the transporter can promptly review and respond by either accepting or rejecting new work order. If the transporter accepts the shipment, the system generates a work order to the transporter and sends notifications to shipper regarding the shipment schedule date. In case of rejection, the system informs the shipper that the shipment has been rejected and suggests selecting another available transporter.
