

The Digital Logistics Layer

The Company:

Mahyu is a digital logistics technology company building an interconnected ecosystem for logistics and trade. We connect specialized solutions, digitize workflows, and use AI to automate operational processes. Our ecosystem turns transaction data into business intelligence and scales through strategic partners across markets.

What We are, every user in the chain connected:

Real-time Order Matching and Dispatch.
Live Shipment Tracking End-to-End.
Digital Proof of Work-in-Progress at Every Handoff.
Automated Customs Declaration & Clearance.
Integrated Payment & Settlement.

A Multi-Trillion-Dollar Logistics Market.

Still Operating without a Unified Digital Logistics Platform

Global Logistics is massive, but Fragmented

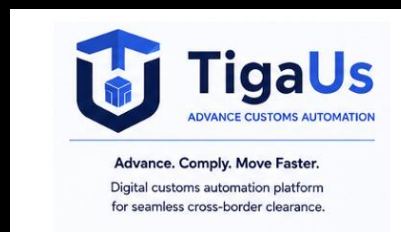

Mahyu Connects. Collaborates. Expands.
