

Digital Logistics Network

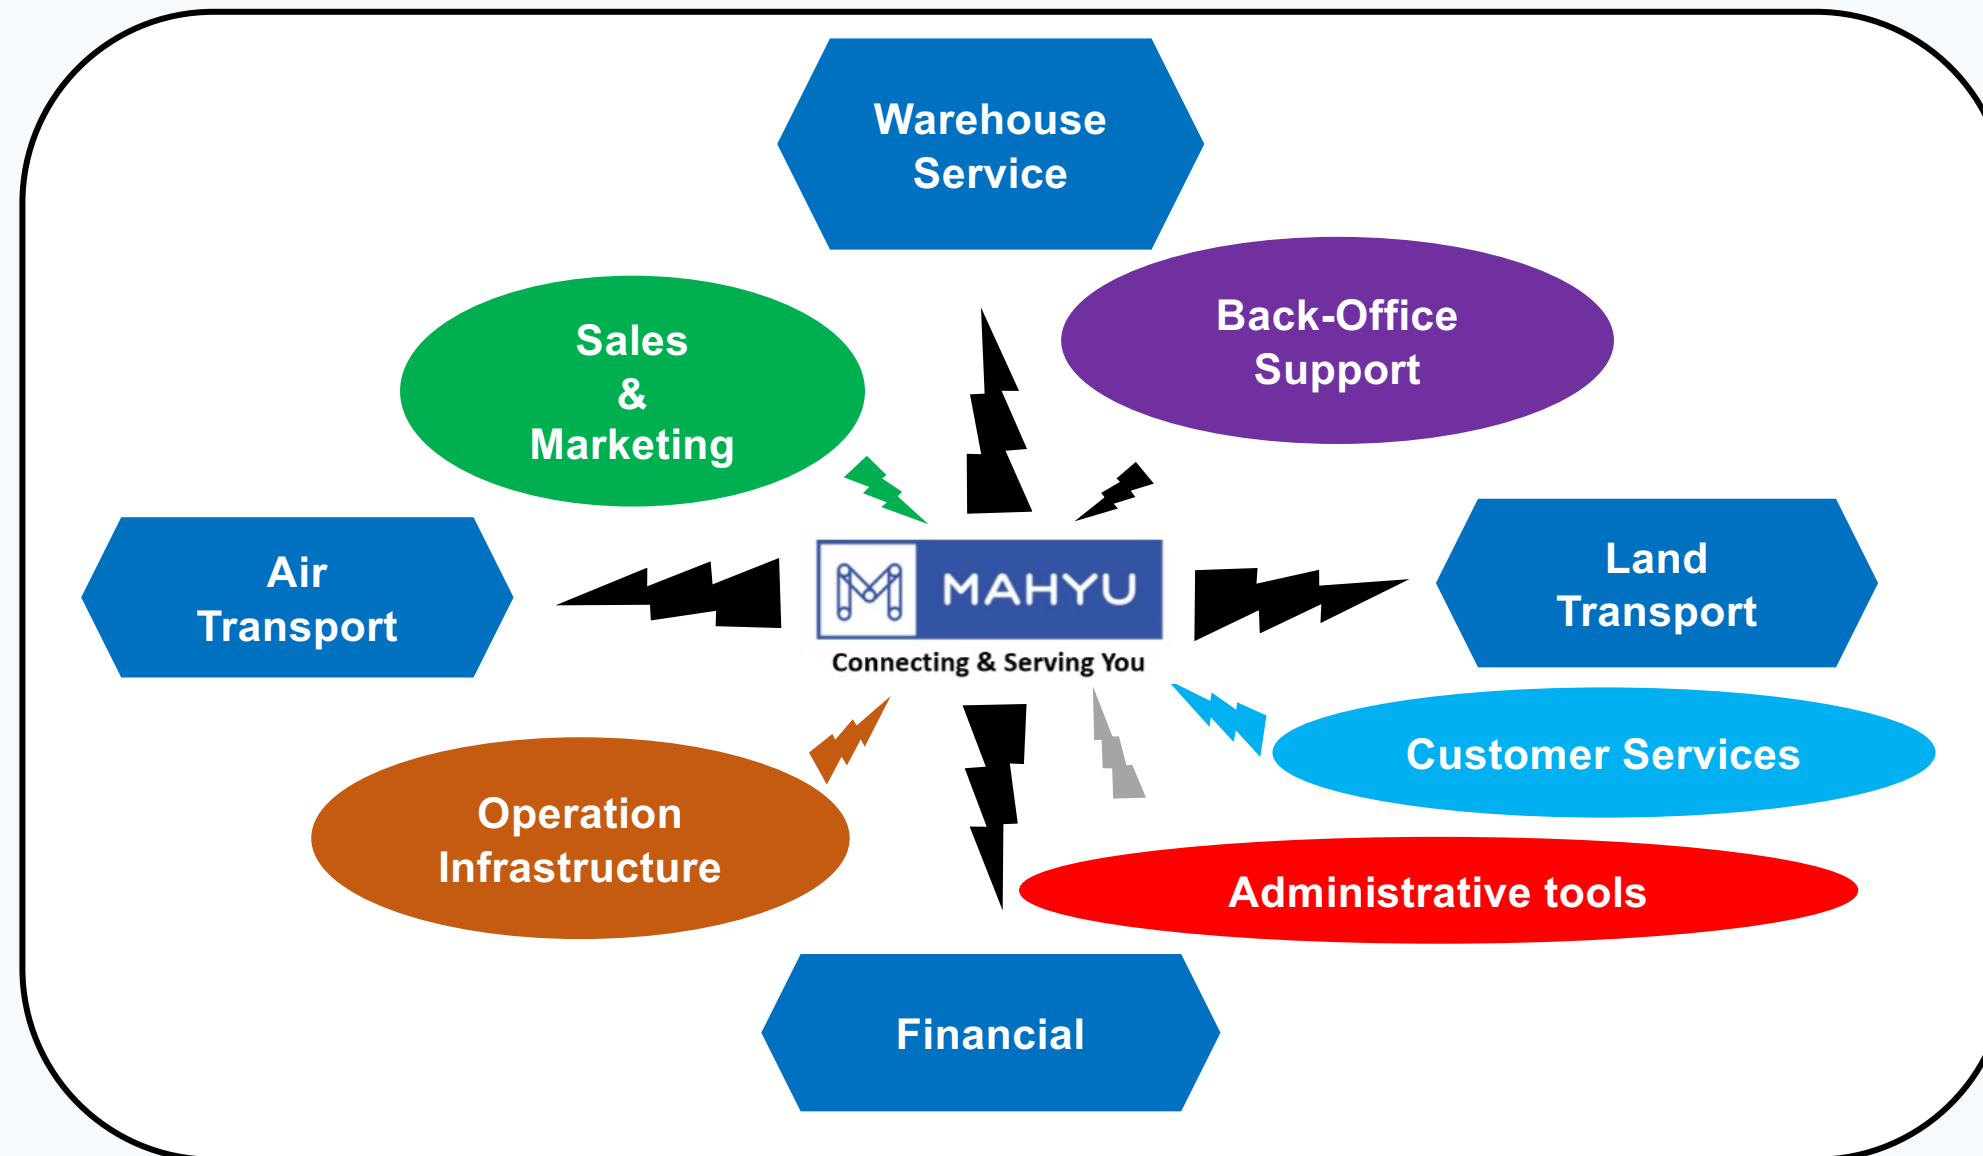

How technology platform brings the power of Automation and Digitization to logistics industry

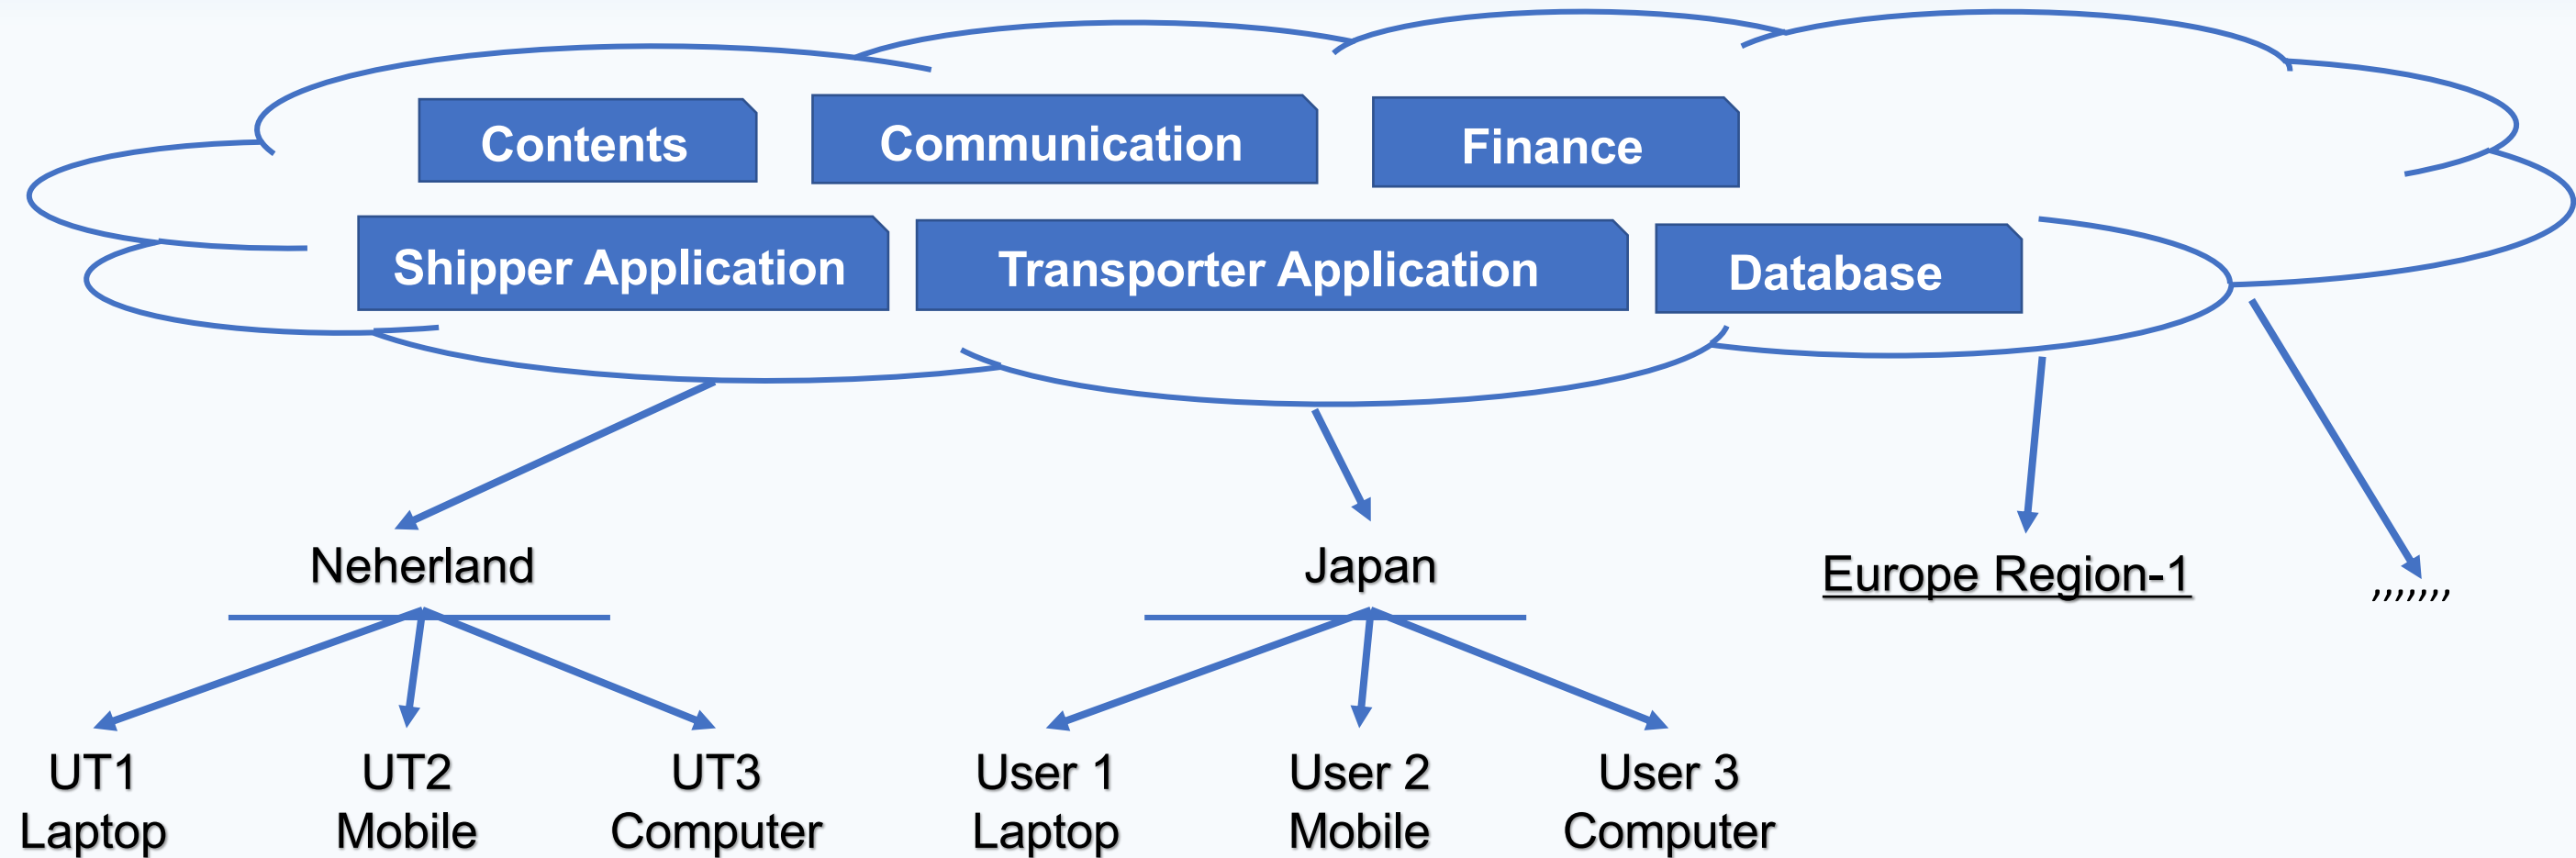

By: [Mahyu LLC](#)

Mahyu LLC

Is a U.S. registered company, operating on <https://www.mahyu.com/>. Mahyu is a developer of a Technological Logistics Platform which empowers the logistics industry's workforce with the digitization of logistics functions, streamline of administrative work, simplification of sales-marketing schemes, and the consolidation of financial aspects.

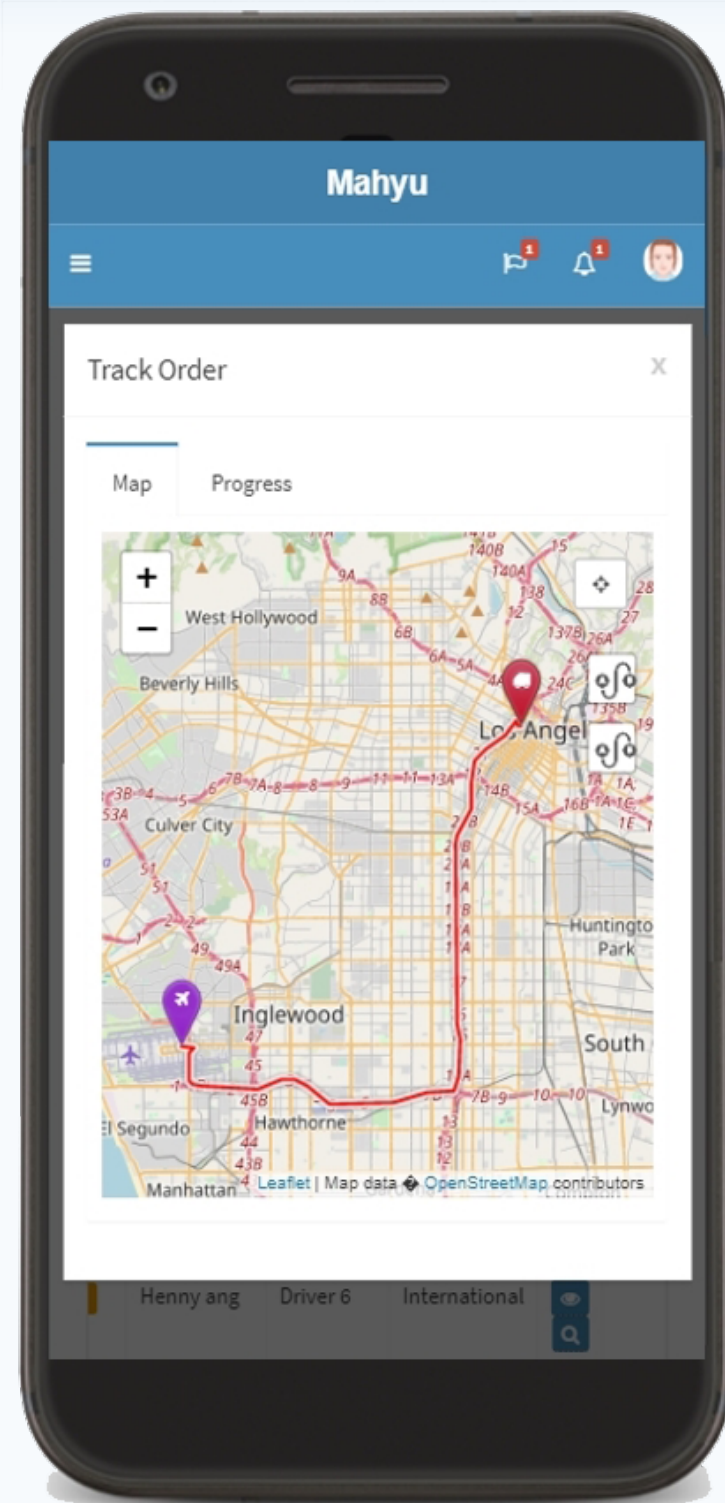

A Platform That Allows You to Progress

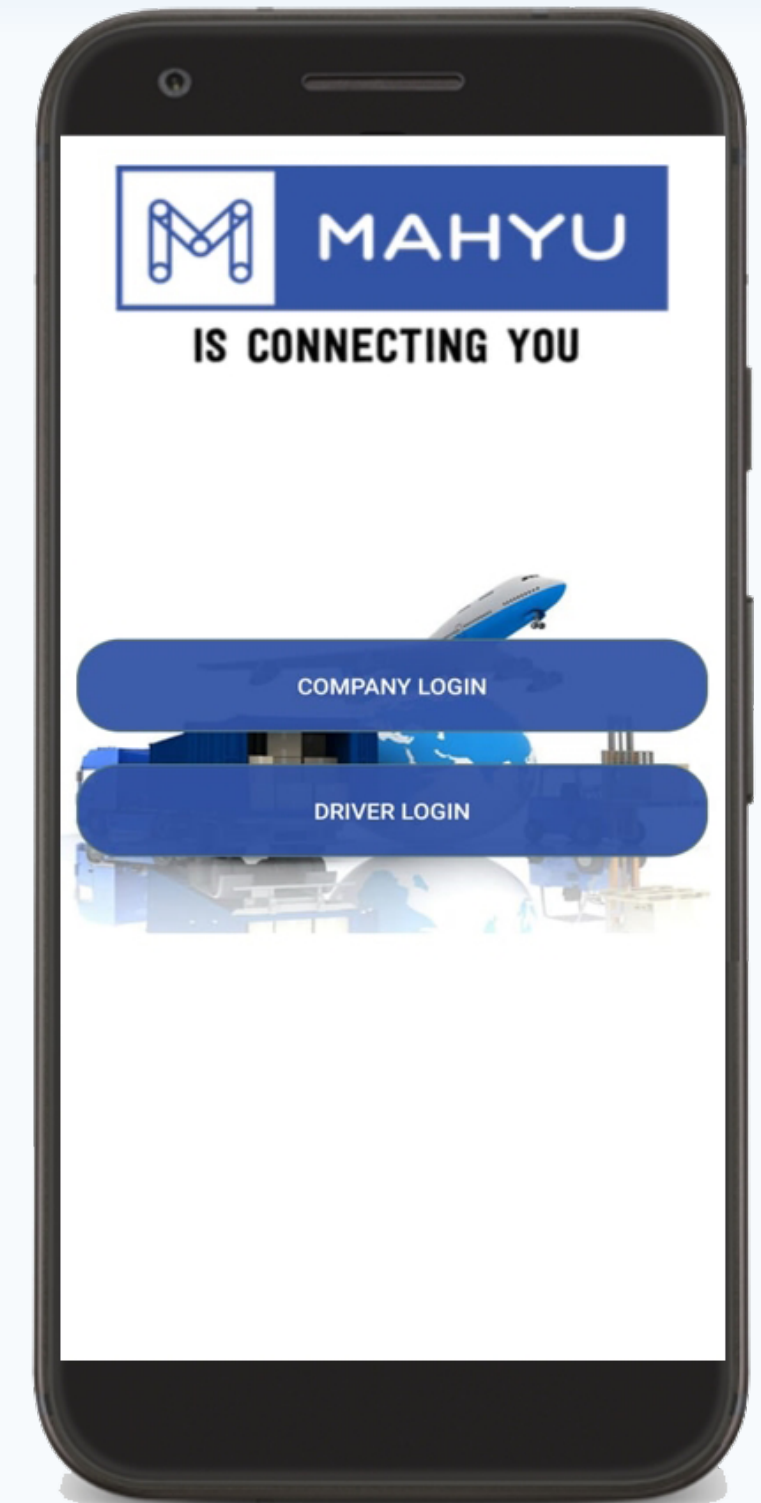

- Mahyu is constructed by advanced mathematical algorithm that able to Integrate-Communicate-Distribute digitize information to each user involved without delay, allowing greater flexibility and better decision making.
- An improved Global Logistics Solution: Business to Business, Business to Consumer (B2B & B2C) requirements.
- Adaptable to all operating system devices (Windows, Android, iOS).

Digital Lifestyle

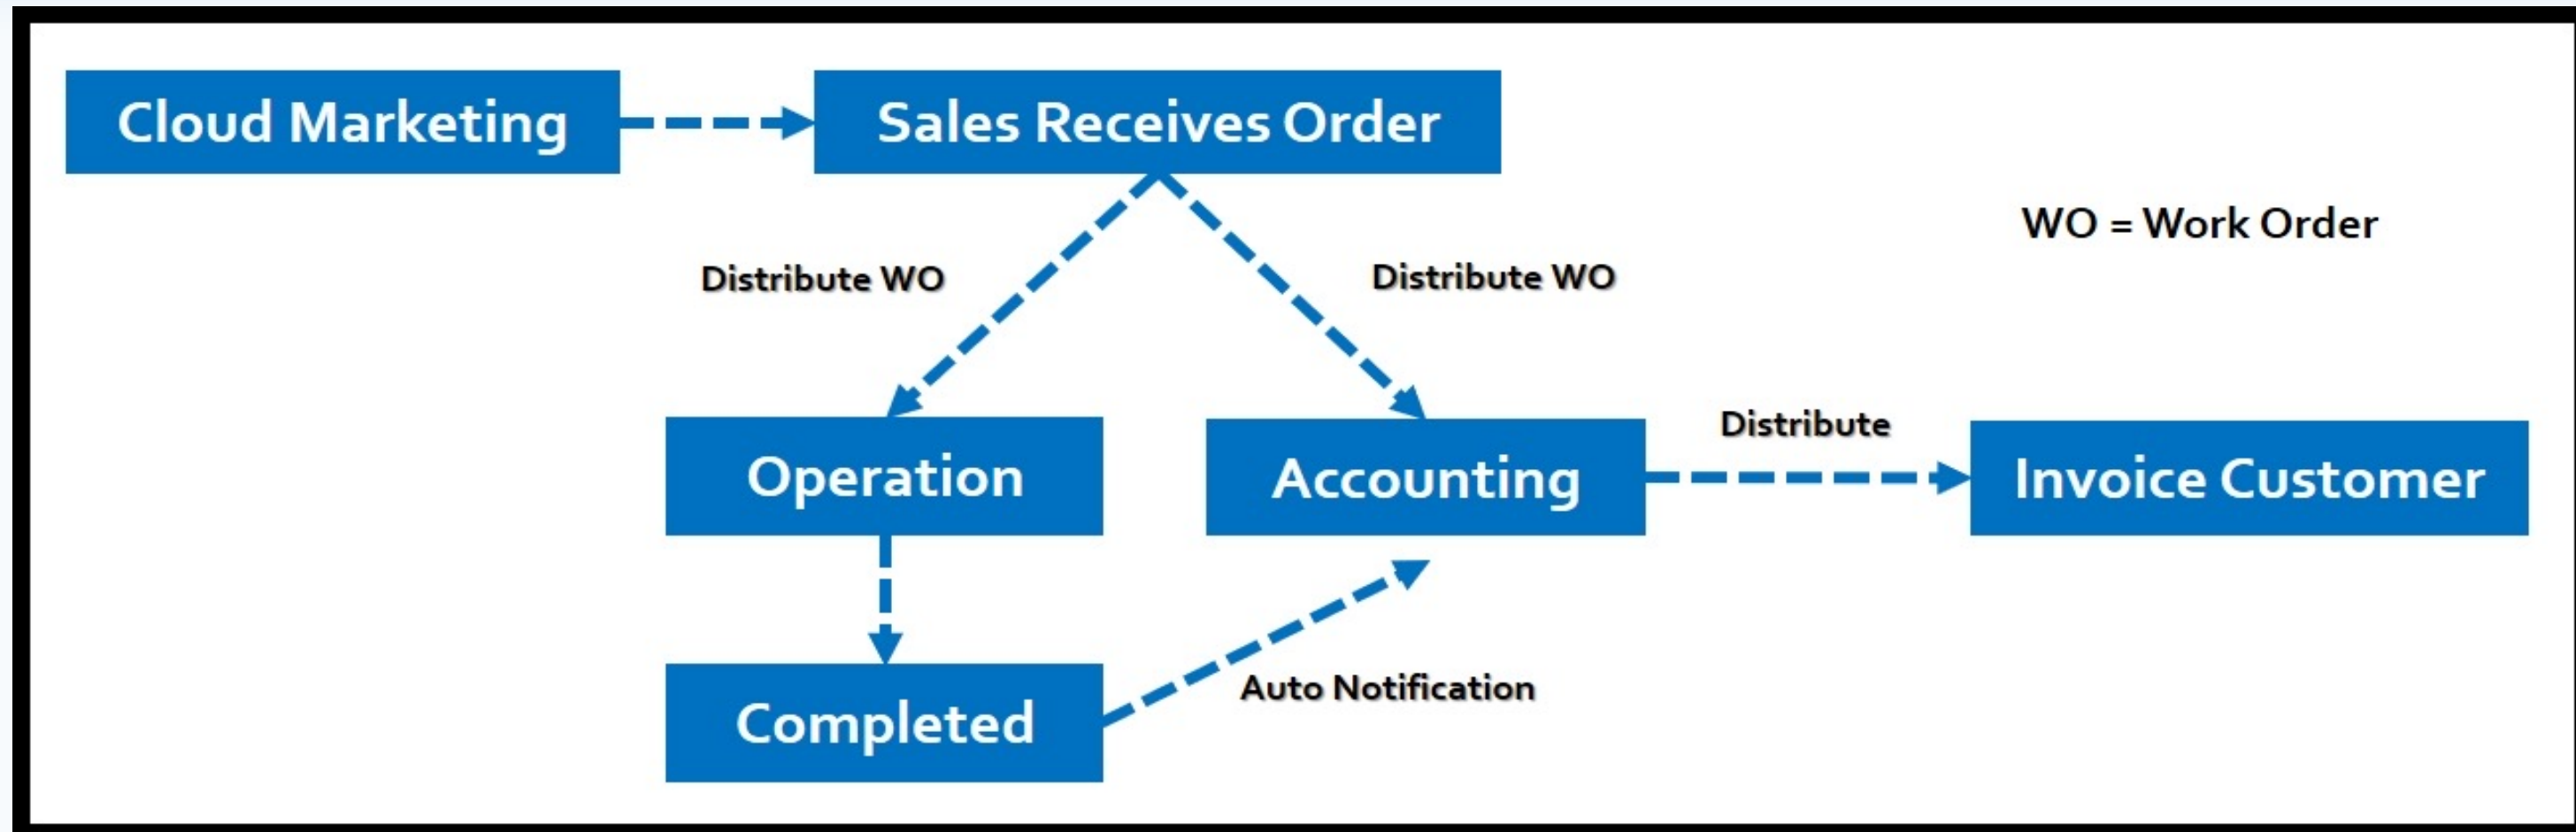

When technology blends
with logistics

Magical moments happen,
Logistics is within your technology finger tips.

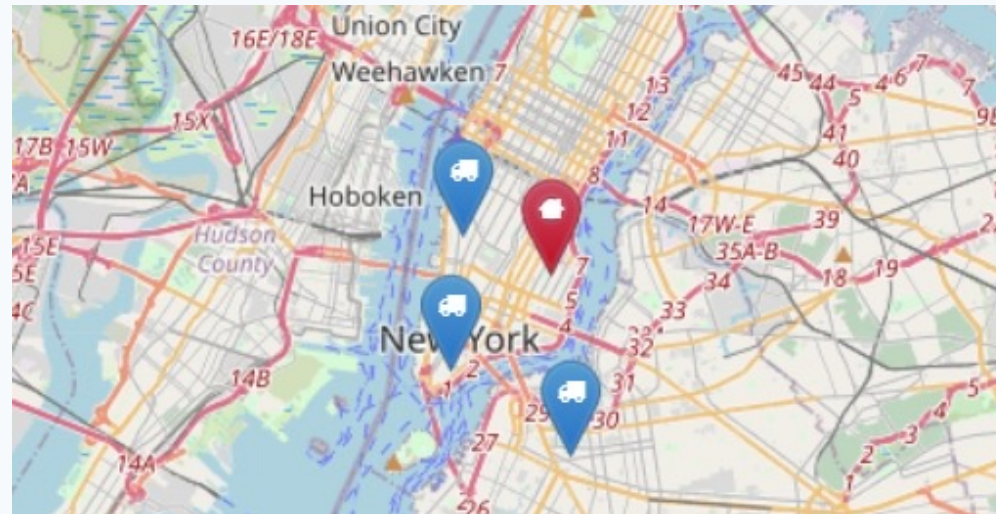

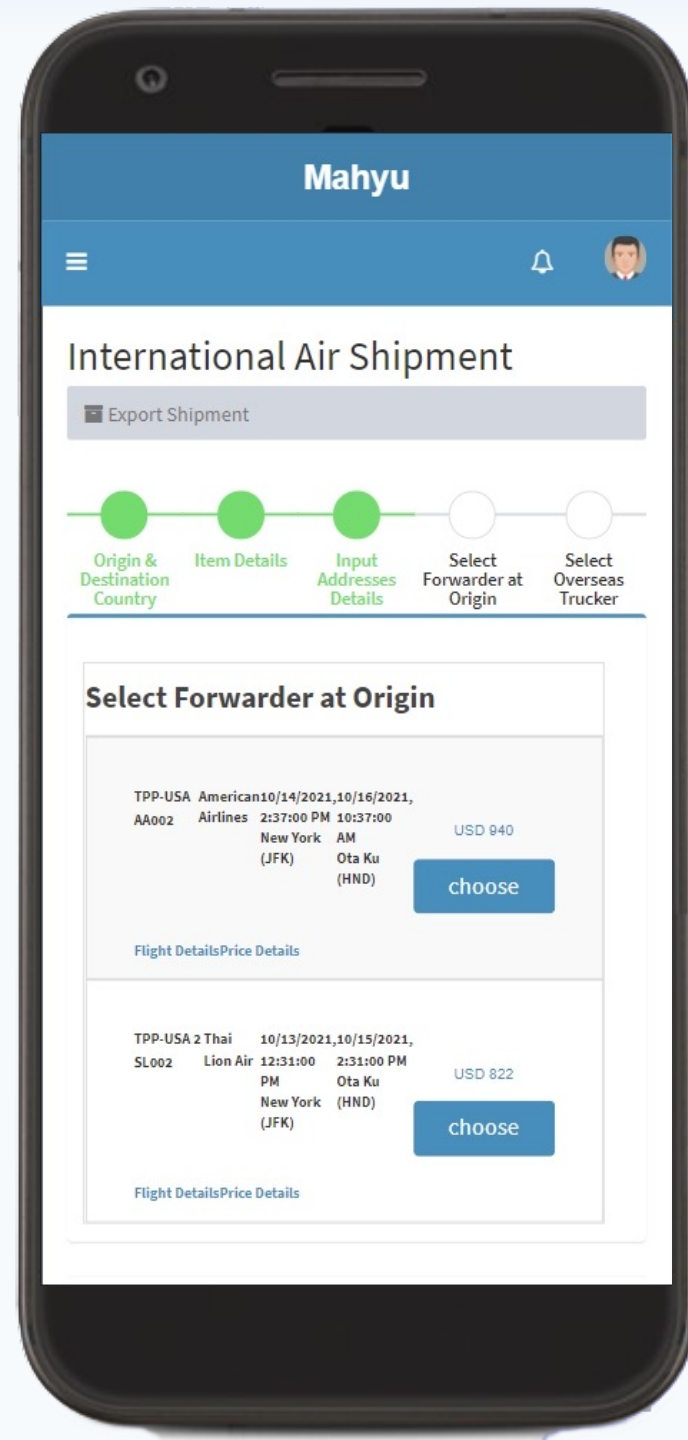

Technology Operation Flow

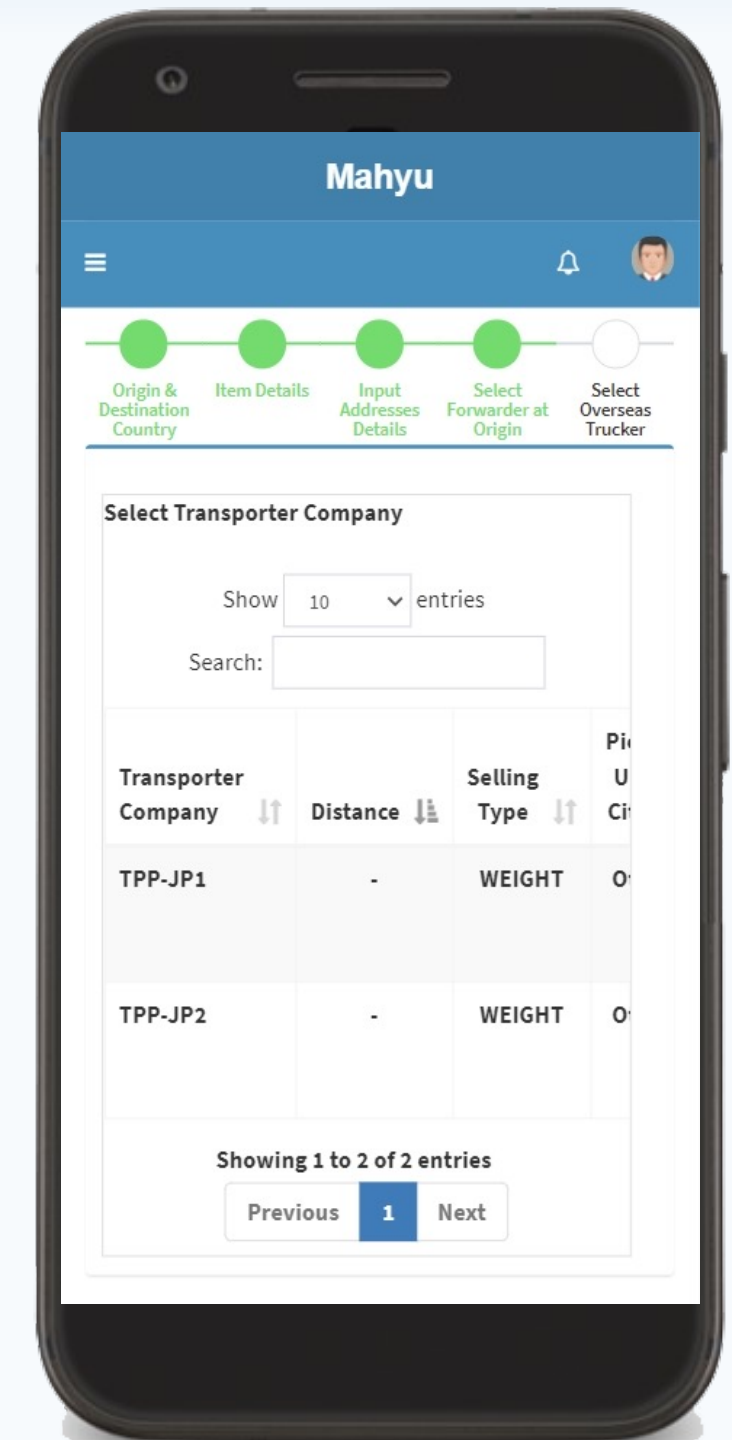

- The rise of internet technology innovation has increased Domestic and Regional ecommerce business transactions, resulted an increase demand of logistics services.
- Shippers and Transporters of each region will benefit with smart algorithm that can distribute real time digitized analysis to multiple parties across different time zones.
- With digitization each logistics function, the industry is able to reduce unnecessary human involvement, minimize office expenses and increased real time responds.

Selection of International Transporters

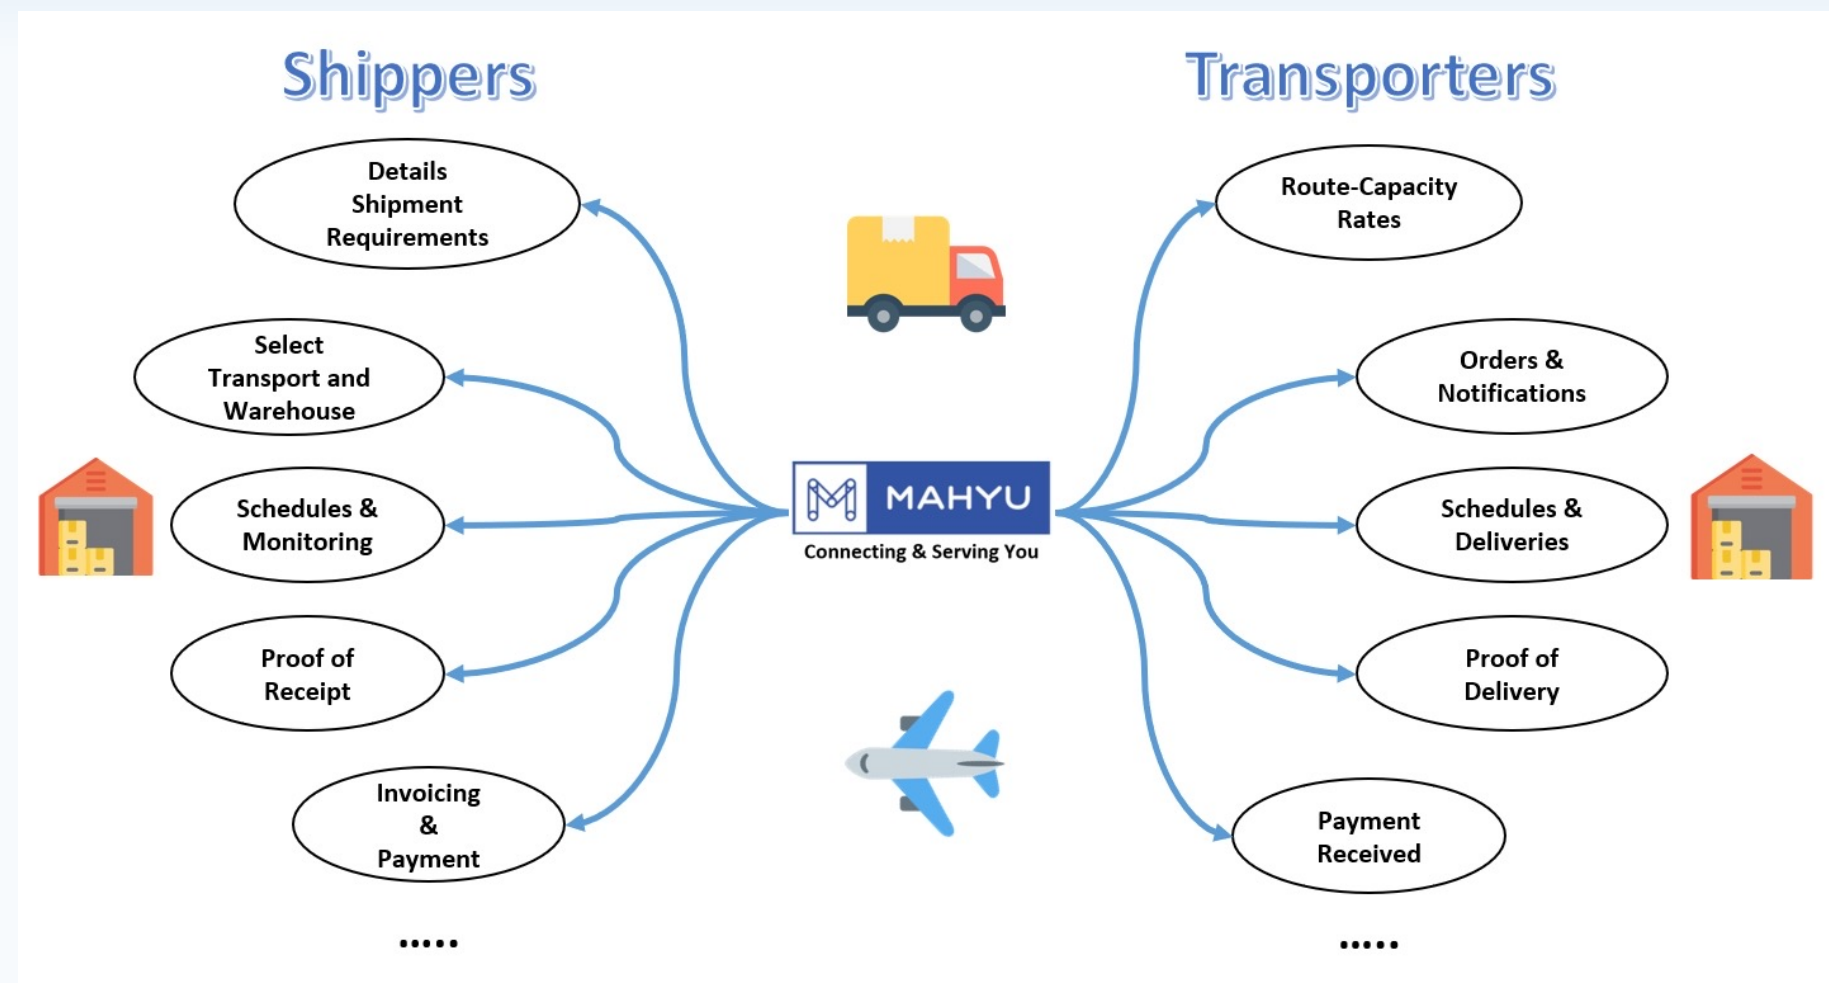

Showing International Transporters, example: *Origin-Japan* and *Destination-USA*

Shipper is easily to select preferred transporter with just a few clicks

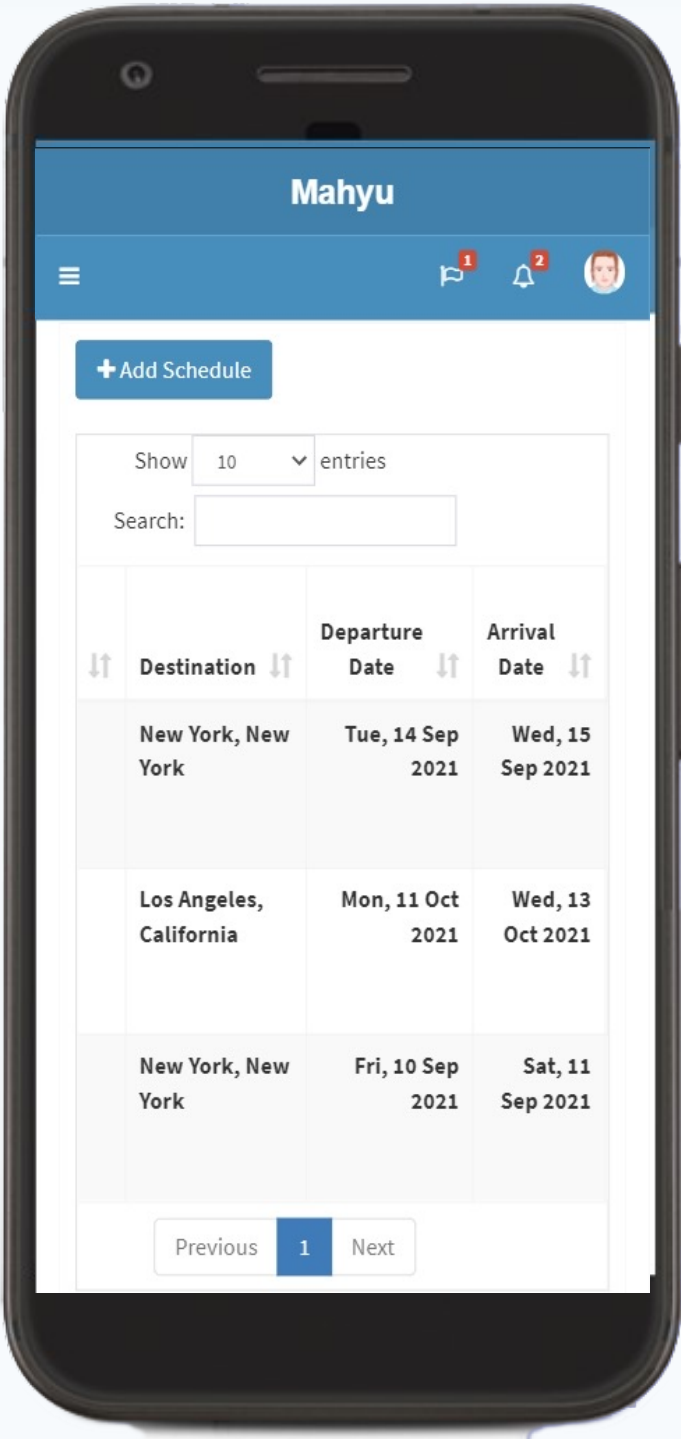

Interconnected Data Distribution

- There is no doubt that every industry will be driven by digitization in platform business model.
- Here are some key benefits of how algorithms will help businesses
 - Algorithm processes information much faster than humans with minimal mistakes.
 - Algorithm - Automation will be able to detect problems & provide solutions in an instant.
 - Algorithm able to perform multitasking transactions simultaneously.
 - Algorithm systems with faster internet connection enable to deliver digitized information across different time zones, improving efficiency and productivity.

Domestic Land Transport - Warehouse Service

Shipper USA

\$ 0.00 / 14,000,000.00

Net-30 Days

Digital Payment Status

Shipper to view and select Domestic Land Transport and Warehouse Services in real time

Country	City	Company	Warehouse Name	Warehouse Type
Indonesia	Jakarta Pusat	Abadi	Warehouse Vinz	Cold Storage
Indonesia	Jakarta Pusat	Dwitunggal	DW	Clean Room
Indonesia	Jakarta Pusat	Sprint	Warehouse SPT	General Area
Indonesia	Jakarta Pusat	Company V	ADDS	General Area
Indonesia	Jakarta Pusat	Eddy indo	Cold Storage Indo	General Area

Technology Platform Advantages

ADVANTAGES TO TRANSPORTER

Integrated: Land-Air-Warehouse services

Domestic and International partners to cooperate

Auto forwarding new marketing information

Direct communication & interaction with shippers

Real time monitoring and tracking system

Data distribution to parties involved without delay

Real time Global Web Mapping System

Customer services assistance

Integrated : Sales-Operation -Finance-Administration

Convenient digital payment system

Summary transaction information

Operate with less human workforces, increase profit

ADVANTAGES TO SHIPPER

Real time selection of: Land-Air transport and Warehouse service

Variety of warehouse services: General, Cold and Clean Room

Verified and reputable logistics companies

Transparent and Dynamic pricing

Direct communication & interaction with transporter

Online customs regulation assistance

Security identification during pickup and delivery process

Variety of digital payment selection

Real time Global Web Monitoring System

Real time proof of pickup and delivered shipment

Inventory Management System

Summary transaction information

Thank You!

"The logistics industry is changing at a pace even faster than you can ever imagine"
